The Triad Difference

As a Triad Isotopes customer, you rely on us to be a trusted member of your patient care team. That's a responsibility we take very seriously. We are proud to set the standard for service in our industry, and that over 75% of Triad Isotopes customers have been with us for more than 10 years.

Let us tell you what sets us apart.

**EXPERTISE** Nuclear pharmacy isn't just our core business, it's our only business.

Serving over 4 million patients annually, Triad is the fastest-growing radiopharmaceutical provider in the country. Our pharmacists understand their local markets and they work hard to learn your business.

- Triad Isotopes’ industry-leading quality management and internal safety audit program helps guarantee compliance with applicable regulations and standards. We have made significant capital investment in our nationwide network of pharmacies to ensure that they meet and exceed the standards for compounded sterile preparations as defined by the United States Pharmacopeia (USP <797>) and Board of Pharmacy regulations.

- The Triad Institute of Learning, which is dedicated to advancing nuclear medicine and supporting our customers, offers a number of Continuing Education programs to keep you and your staff up-to-date on the latest industry trends and requirements. Continuing Education credits are available through Triad Isotopes as both live and online courses.

**CHOICE** No one-size-fits-all approach.

At Triad Isotopes we recognize that every customer, and every patient, has unique circumstances and requirements. Our products are formulated to your exact specifications.

- Triad Isotopes is not a manufacturer offering a finite group of products. Our pharmacies are open formulary, providing customers with a full array of radiopharmaceutical options.

- Clinicians may select the products they prefer to achieve the highest benefit for their patients. We will never force, or steer, our customers to use an agent they do not prefer.

**SERVICE** National coverage; local connections.

In less than a decade, Triad Isotopes has grown to become the second-largest radiopharmaceutical chain in the nation. While this growth has substantially increased our ability to reach and serve our customers, we continue to provide the personal attention and service you'd expect from your neighborhood pharmacy.

- As a customer of Triad Isotopes, you can rely on us to put the safety of your patients and the quality of your radiopharmaceuticals above all else. Our company procures and supplies products exclusively from FDA-approved, cGMP compliant manufacturers — not compounding pharmacies or other gray-market sources.

- Triad drivers are an important part of our team. Delivery of nuclear medicine products is accomplished in a timely, professional manner with strict adherence to hospital security and patient privacy considerations.

- Daily scheduled deliveries are built into your contract, and you can count on us for reliable emergency delivery service as well. If a delivery is required at a specific time, no problem. We will work with you to make sure it’s there.

**RELIABILITY** Our community is our business.

While we are proud of our company’s growth, we’ve never forgotten that at the heart of our business are the people and places that we serve. Committed to building our business on relationships that last, we encourage Triad team members to share their time and talents in the communities where we live and work. We believe it is our “patient focused, community driven” approach to business that best reflects the Triad difference.

- Triad's corporate giving program allows local Pharmacy Managers and Sales Directors discretion to contribute to local charities and initiatives that are most near and dear to the heart of their communities.

- Joe’s Kids – a program designed to support our communities, one child at a time – was established in 2011 in remembrance of our colleague Joe Blair, who served as pharmacy manager with our Saginaw, Michigan team. Through Joe’s Kids, we provide scholarships for children with disabilities and at-risk youth to attend ACA accredited summer camp programs nationwide.
